

Victorian Employer Skills and Training Survey 2017

Construction

Over 12,100 employers responded to the training and skills component of the *Victorian Employer Satisfaction and Skills Survey* in 2017. Of these, 1,187 were from the Construction industry. Employers report that skills are important to productivity, but many are facing challenges filling jobs and finding the right applicants with the right skills. These challenges are faced both now, and are expected to continue into the future. However, a high proportion of employers that access training to improve the skills of their workforce report a positive impact on productivity and return on investment. The statistics below reflect the experience of employers in the Construction industry compared to the overall Victorian average.

Skills are important to productivity

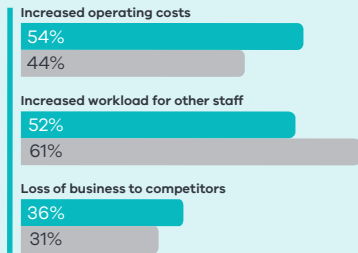

Businesses found that a lack of skills had a high to medium impact on workplace productivity.

Impact of insufficient workforce skills

A lack of skills can affect operating costs, increase the workload for other staff and result in a loss of business to competitors.

Managing the skills of the workforce

Employers reported that recruitment was challenging due to candidates not having the required skills or being job ready.

A quarter of employers saw the need to improve the skills of existing staff.

Recruitment challenges

Employers faced recruitment challenges because potential candidates did not have the required job specific and technical skills.
