

Play your part in fire safety

Cladding Safety Victoria has been working with apartment owners and tenants to rectify combustible cladding on more than 200 of Victoria's highest-risk apartment buildings.

We're making sure all residents are aware that combustible cladding has been identified on the external walls of this apartment building*. Follow the practical steps on the other side of this flyer to prevent fire starting and spreading and keep you, your family and neighbours safe. For more information visit: www.vic.gov.au/cladding-safety

*This flyer is intended for the residents of buildings in the Cladding Rectification Program only and is not meant to be distributed or read by residents in buildings that do not have combustible cladding or are not involved in CSV's program. **This flyer has been developed in consultation with Fire Rescue Victoria and the advice presented is consistent with fire safety information available on their website. Anyone seeking fire safety information in other languages can visit www.frv.vic.gov.au/home-fire-safety-booklet

Store gas bottles away from sources of heat. Keep BBQs at least 50cm away from anything that could burn.

Use a heavy, high-sided ashtray made of glass, ceramic or metal. Always fully extinguish cigarettes.

Remove rubbish, clutter and flammable items from balconies and keep furniture away from exterior walls.

Keep clothing and other items at least one metre away from air conditioning units.

Ensure smoke alarms are not covered or disconnected and are tested each month.

Always keep fire doors clear, closed and unlocked. Know the building fire emergency plan and be familiar with escape routes & procedures.

Keep a dry powder fire extinguisher easily accessible in your home at all times.

In case of an emergency, call 000.
